Bookero

Team: Thursday Group 8

Sprint: 5
Date: 22/10/2021

Attended:
Scrum Master: Kartik Kumar
Product Owner: Dipto Pratyaksa
Development team: Aaron Fisher
Shreshta Ghosh
Oliver Andrew Hale

1. Things That Went Well

Every member of the team contributed equally.
The team met every deliverable and on time.
The team is really friendly to each other as we come to the end of this project.
Meetings were given more attention and the way we do meetings.
Each member worked on their tasks without any hassle.

2. Things That Could Have Gone Better

Code integration could have been given more focus in the initial parts of the sprint. Codebase should've been refactored regularly after every sprint. Configuring small details like CORS could've been done earlier in the project timeline.

3. Things That Surprised Us

Configuring small things take a lot of effort when the code starts to break on some scenarios. Implementing and provisioning the portal on docker and AWS took more effort than expected.

4. Lessons Learned

Deployment and dockerization should be given more time as they require more effort than expected. Small tweaks in code should be fixed earlier on and not be left for last sprint.

5. Final Thoughts

Things to keep :

The group is really efficient when doing work. Enthusiasm, group
communication and the work ethic of the team.
Delivering everything on time.
Major tasks implemented on time.
Friendly environment.

Things to change :

Group should focus more on small codebase tweaks in the initial parts of the project
